## Year 9 Strand 5

| Topic/Skill               | Definition/Tips   | Example  |
|---------------------------|---|--|
|                           |   | N  |
| Pythagoras'<br>Theorem    | For any <b>right angled triangle</b> :<br>$a^2 + b^2 = c^2$<br>a<br>b<br>Used to find <b>missing lengths</b> .<br>a and b are the shorter sides, c is the   | Finding a Shorter Side<br>y I0 SUBTRACT:<br>8 $a = y, b = 8, c = 10$ $a^{2} = c^{2} - b^{2}$ $y^{2} = 100 - 64$ $y^{2} = 36$ $y = 6$   |
|                           | hypotenuse (longest side).  |  |
| 3D Pythagoras'<br>Theorem | <ul><li>Find missing lengths by identifying right angled triangles.</li><li>You will often have to find a missing length you are not asked for before finding the missing length you are asked for.</li></ul> | Can a pencil that is 20cm long fit in a<br>pencil tin with dimensions 12cm, 13cm<br>and 9cm? The pencil tin is in the shape<br>of a cuboid.<br>Hypotenuse of the base =<br>$\sqrt{12^2 + 13^2} = 17.7$ |
|                           |   | Diagonal of cuboid = $\sqrt{17.7^2 + 9^2}$ =<br>19.8 <i>cm</i><br>No, the pencil cannot fit.   |
| Trigonometry              | The <b>study</b> of <b>triangles</b> .  |  |
| Hypotenuse                | The <b>longest side</b> of a <b>right-angled</b><br><b>triangle</b> .<br>Is always <b>opposite</b> the <b>right angle</b> .   | hypotenuse   |
| Adjacent                  | Next to   | P e)   |
| Trigonometric<br>Formulae | Use SOHCAHTOA.<br>$\sin \theta = \frac{0}{H}$ $\cos \theta = \frac{A}{H}$   | x  |

| Year 9 S                | itrand 5   |  |
|-------------------------|--|--|
|                         | $\tan \theta = \frac{\theta}{A}$ $\int_{S} \frac{\theta}{H} + \frac{\theta}{C} + \frac{\theta}{T} + \frac{\theta}{T}$ When finding a missing angle, use the 'inverse' trigonometric function by pressing the 'shift' button on the calculator. | $\tan 35 = \frac{x}{11}$ $x = 11 \tan 35 = 7.70 cm$ $x = 11 \tan 35 = 7.70 cm$ $x = \frac{7 cm}{5 cm}$ Use 'Adjacent' and 'Hypotenuse', so use 'cos' $\cos x = \frac{5}{7}$ $x = \cos^{-1}\left(\frac{5}{7}\right) = 44.4^{\circ}$ |
| Proof                   | Logical mathematical arguments<br>used to show that a statement is<br>true.  |  |
| Demonstration           | An example which shows that either a statement can be true or that shows that a statement can't be true.   | The product of two whole numbers is<br>always an odd number.<br>3 x 4 = 12<br>We have demonstrated that this is not<br>always true.  |
| Odds and Evens          | An even number is a multiple of 2<br>An odd number is an integer which is not<br>a multiple of 2.  | If n is an integer (whole number):<br>An even number can be represented by<br><b>2n</b> or <b>2m</b> etc.<br>An odd number can be represented by<br><b>2n-1</b> or <b>2n+1</b> or <b>2m+1</b> etc.                                 |
| Consecutive<br>Integers | Whole numbers that follow each other in order.   | If n is an integer:<br><b>n</b> , <b>n+1</b> , <b>n+2</b> etc. are consecutive<br>integers.  |
| Square Terms            | A term that is produced by multiply<br>another term by itself.   | If n is an integer:<br>$n^2$ , $m^2$ etc. are square integers  |
| Sum                     | The sum of two or more numbers is the value you get when you add them together.  | The sum of 4 and 6 is 10   |
| Product                 | The product of two or more numbers is<br>the value you get when you multiply them<br>together.   | The product of 4 and 6 is 24   |
| Multiple                | To show that an expression is a <b>multiple</b> of a number, you need to show that you can <b>factor out the number</b> .  | $4n^2 + 8n - 12$ is a multiple of 4 because it can be written as:  |

| Year 9 Strand 5 |               |  |
|-----------------|---------------|--|
|                 | $4(n^2+2n-3)$ |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
|                 |               |  |
