Year 9 Strand 5

Topic/Skill	Definition/Tips	Example			
Mean from	We can estimate the mean from a grouped	Height in cm	Frequency	Midpoint	$\mathbf{F} \times \mathbf{M}$
grouped data	frequency table.	0 < h ≤ 10	8	5	8×5=40
	This is only an estimate because we do not	10 < h ≤ 30	10	20	10×20=200
	know the exact values of the data within	30 < h ≤ 40	6	35	6×35=210
	the groups.	Total	24	Ignore!	450
	 Find the midpoints (if necessary) Multiply Frequency by values or midpoints Add up these values Divide this total by the Total Frequency 	1	Estimatec height: 45 18.75cm		
Scatter Graphs	A graph in which values of two variables are plotted along two axes to compare them and see if there is any connection between them.	Statistical for early interested 2.2.1			
Correlation	Correlation between two sets of data means they are connected in some way.	There is correlation between temperature and the number of ice creams sold.			
Causality	When one variable influences another variable.	The more hours you work at a particular job (paid hourly), the higher your income <u>from that job</u> will be.			
Positive Correlation	As one value increases the other value increases .	Positi	ive Correla	time of them to	
Negative Correlation	As one value increases the other value decreases .	Negative Correlation			
No Correlation	There is no linear relationship between the two.	No Correlation			
Strong Correlation	When two sets of data are closely linked .	Strong Positive Correlation			

Year 9 Strand 5

Weak	When two sets of data have correlation,		
Correlation	but are not closely linked .	Weak Positive Correlation	
Line of Best Fit	A straight line that best represents the data on a scatter graph.	x x x x x x x x x x x x x x x x x x x	
Outlier	A value that 'lies outside' most of the other values in a set of data. An outlier is much smaller or much larger than the other values in a set of data.	Outlier Outlier 0 0 20 40 60 80 100	
Stem and Leaf diagrams	An efficient method of ordering and representing data by grouping numbers that have the same digit in their first or second place value digit	The key shows us how to read the diagram KEY: 2 5 means 25 0 6 7 8 1 0 2 3 4 7 7 7 8 9 2 1 3 4 4 5 7 3 1 1 2 6 6 9 4 1 5 5 6 9 5 0 0 This number is 39	
Money Calculations	Money calculations should always be represented in £'s and pence	E.g. Sixteen pounds and twenty pence should be written as £16.20 not 16.2, 16.20 or £16.2	
Wages	This is money that earnt either per day, week, month or year.	210:20 Hot 10:2, 10:20 01 210:2	
Tax	Tax is added onto the price of goods or services. Alternatively, it can be taken off wages or other income.		
VAT	Value added tax is added onto the price of goods or services. Currently the rate of VAT is 20%.	The cost of a fridge is £200 + VAT. What is the total cost? £200 x $1.2 = £240$ The total cost is £240	
APR	Annualised Percentage Rate – This is the interest charged on a loan or credit card.	A £12000 loan is taken out at a rate of 11% APR. If the loan is paid back after one year that total amount to be paid back would be £12000 x 1.11.
