

The Cambridge Mathematics School – **a new state-funded specialist sixth form** being developed in partnership with the University of Cambridge – opened in September 2023 with a focus on pioneering learning and increasing diversity in the **field of maths**.

UNIVERSITY OF
CAMBRIDGE

Core Curriculum

More than A Levels

Academic Literacy

A framework for understanding university writing practices

- be proficient in reading and writing about academic subjects
- be able to discuss and analyse
- productively contribute to ongoing conversations within specific academic fields.

and develop your ability to understand and synthesize scientific concepts, phenomena and processes.

CurriculumX

Lectures/talks/workshops
University level courses
Projects set by industry and academic mentors

Curriculum X has introduced me to a whole new and exciting way of learning. We explore ideas from areas of mathematics that are new to me and apply them to intriguing situations.

Reemon, King's Maths School student

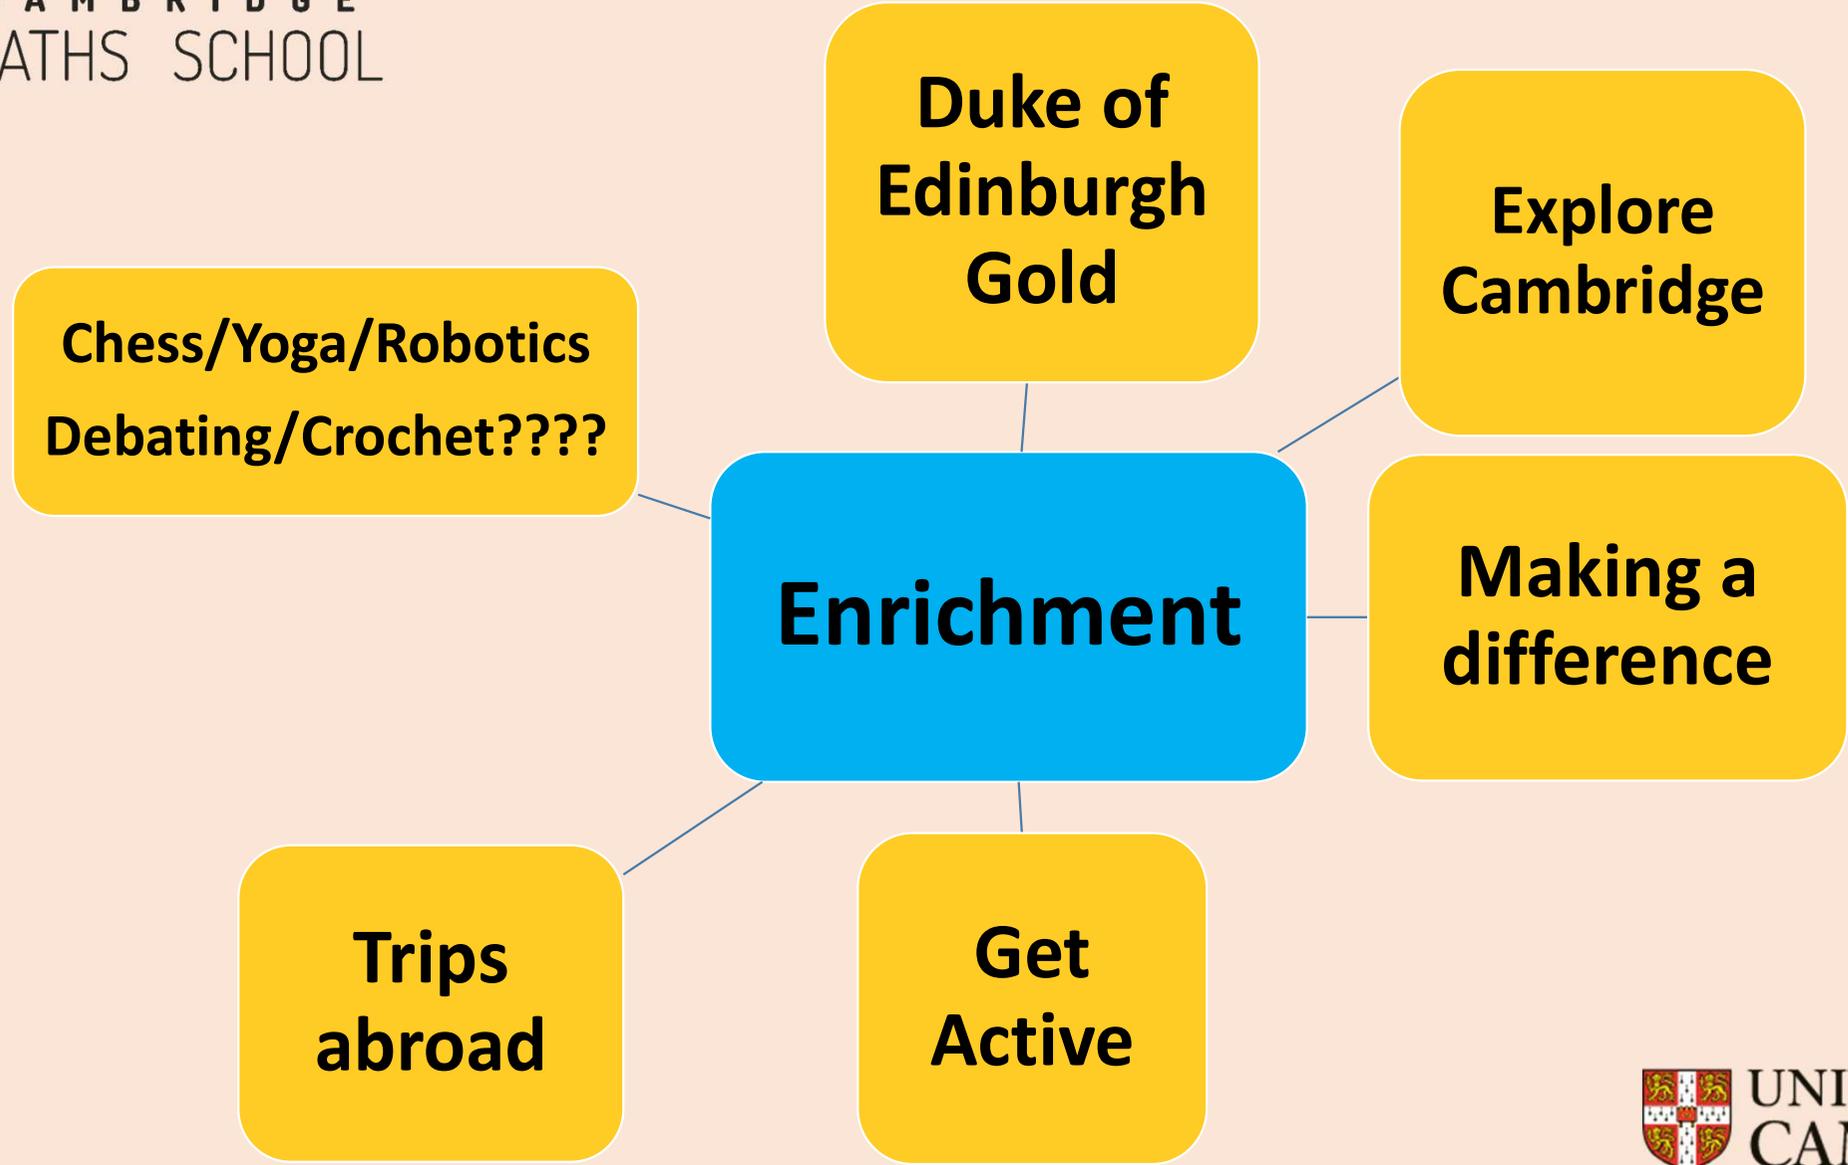

Hear more from students who have studied in Maths Schools

In a normal day there are some normal lessons, sometimes problem solving sessions like maths challenge activities. The curriculum included Uni level Maths accessible to A level plus STEP sessions which I loved.

Lots of social activities - societies and activities at lunchtimes and after school. Everyone had shared interests and were easy to get on with.

The teachers are really supportive – they really push you to explore Maths.

Why choose a Maths School?

You want to go much further than the A level curriculum.

You want to work with University academics alongside your expert teachers.

You want to study in a community where everyone is passionate about the subject.

You love Maths
