Healthcare Careers Summer Programme 2021

28th & 29th July, 10am-2:30pm

Have you ever thought about what roles there are in the NHS and healthcare sector? Do your students think they're all clinical and patient-facing and you need a university degree to do them?

This two day summer programme - virtual career event is for students to discover what a career in the NHS and healthcare sector could look like, and meet staff from various clinical and non-clinical roles, whether in a hospital setting, a research setting or in the community across the whole of Cambridgeshire, Peterborough and Fenland.

This programme is aimed at students aged 14-19, who face barriers to participation in events and NHS and healthcare sector recruitment activity and are entitled to free school meals.
